NCDHHS Launches Testing and Contact Tracing Resources to Help Slow the Spread of COVID-19 in North Carolina

Raleigh, N.C.

Jun 4, 2020

Today, the North Carolina Department of Health and Human Services (NCDHHS) launches new initiatives to expand COVID-19 testing and contact tracing across the state and help North Carolinians protect their families and neighbors. Testing and tracing are core public health measures and key components of North Carolina's strategy to responsibly ease restrictions, while continuing to slow the spread of the virus.

North Carolinians can now access new online tools to determine if they should consider being tested for COVID-19 and find a nearby testing place. The tool will also help individuals monitor their symptoms if they have tested positive for or been exposed to COVID-19. In addition, NCDHHS launched a new platform to integrate contact tracing efforts across the state under the COVID-19 Community Team. More than 900 local health department staff and other Community Team members have been trained on the software and many have begun using it in their ongoing contact tracing work.
